

200 to 1200 CFM

HORIZONTAL HIDEAWAY WITH PLENUM WITH PIPING PACKAGE ENCLOSURE 200 CFM TO 1200 CFM

The Horizontal Hideaway with Plenum fan coil unit is ideal for mounting in above-ceiling locations like closets, hallways or bathroom areas. The design enables the unit to be adapted to installations requiring return air ducts or to be used as a return-air plenum with a unit-mounted filter and filter-rack assembly. The units are shipped from the factory ready for installation with the plenum section in place. No field fabrication is required. The unit shown has the factory installed optional piping package enclosure and paint. Standard CPY units are provided with a galvanized finish.

IEC'S PIPING PACKAGE ENCLOSURE

ADVANTAGES:

- Internally insulated piping compartment
- Minimize on-site field labor install costs
- Factory mounted valve packages
- Easy field sweat/braze connections on the outside of the unit
- Enclosure provides additional protection of valve package
- Large access door to internal components
- Keeps valve package out of air stream
